

OSA 5410/11

Syncjack technology. Can operate in Slave, Boundary and Master Clock Mode.

OSA3230B Cesium Clock

Performance exceeding G.811 / Stratum 1 PRC. Perfect for T&F Distribution, Telemetry, Metrology, 3G/UMT, SONET, Railways.

OSA 5548C TSG

Scalable synchronization solution ranging from 20 unprotected up to thousands of 1:1 protected outputs for central offices.

OSA 5420

With integrated Syncjack technology, the 5420 provides a smooth migration from legacy sync to next generation by supporting both precise PTP and legacy interfaces in the same product.

OSA 5401 Syncplug

This pluggable SFP functions as a Synchronous Ethernet source, GNSS receiver and a grandmaster clock. The benefits of space and energy efficiency mean significant savings in installation and engineering tools.

FSP 3000 ALM

Enables real-time monitoring, fault detection and fault localization for access and dark-fiber links using low-cost OTDR with passive optical demarcation.

FSP 150 ProNID

A multi-layer service demarcation solution specifically engineered to enable network openness, security and service assurance - critical components for NFV optimized NIDs.

FSP 150 ProVM

An edge NFV product that consolidates several customer premise appliances into one box. It's a server capable of hosting applications and a demarcation device that can monitor applications and network activity.

FSP 3000 CloudConnect

The industry's only truly open Data Center Interconnect (DCI) solution. Scalability from Gigabits to Terabits with disaggregated options, fully open hardware and fully open software.

MicroMux

The FSP 3000 module provides unprecedented client port flexibility for DCI applications without compromising power, space or spectral efficiency.

ConnectGuard

A protocol-agnostic encryption product that can scale from 1G to 100G. Secure and dynamic key exchange with additional layer of security beyond IPsec. Layer 1 and 2 Encryption solutions.

FSP Network Manager

Provides end-to-end configuration, management and surveillance of networks built from ADVA FSP network elements. Secure access through any node.
