

Ambor Structures is a leading steel pole supplier with an extensive range of products, customized engineering services, and proven international project management experiences.

With over 20 years of experience engineering and manufacturing monopoles, mechanical lowering systems, and other innovative structural components in the pole industry, Ambors' engineers have experience to anticipate and meet individual customer's expectations.

### Small Wind Pole

Lasting small and medium (up to 100kW) wind monopoles. Built to withstand a range of harsh weather conditions and provide for ease of installation at even remote locations.

### Telecom Pole

Custom-made towers deliver lasting, high-performance wireless telecom solutions. Installs in less than a day.

### High-Mast Lighting

High Masts for Lighting and CCTV. Also ideal for Highway Signs, Luminaires and Traffic Signals. Also raising and lowering lighting columns for airports.

### Street Lighting

Diverse lighting structures with innovative raising and lowering systems is perfect for street lighting projects.

### Decorative Lighting

Engineers are ready to customize the perfect accent lighting to your street or venue.

### Utility Pole

With rich management and operation experience in the utility industry, Ambor's utility pole has won customers' trust and praise.

### QuikBase Foundation

An excellent non-penetrating, concrete-free foundation solution for sites in remote areas and situations allowing permitting requirements to be reduced or eliminated.

### Raising System

Gives you the ability to raise and lower your wind monopole with ease, eliminating the need for costly truck and crane installations.
