

MGA2510 Test Platform

Ethernet Testing Platform supports both traffic generation, impairment jamming, as well as inline analyzer and monitoring capabilities for 100M to 10GE, including 2.5G and 5G.

MGA2510 Protocol Analyzer

Ethernet Protocol Analyzer supports inline packet capture, protocol analysis, monitoring and impairment jamming for data rates from 1G to 10G Ethernet, including native copper 10GBase-T without the need for a media converter.

MGA2510 Generator

First 100M, 1G, 2.5G, 5G, 10G Multigigabit Ethernet capable traffic generator and analyzer. BERT, Latency and Throughput testing. Impairment amming for pformance validation under real-world scenarios.
