

Empirix is the recognized leader in delivering end-to-end network performance visibility, empowering clients to improve business performance through solutions that enable them to proactively preempt problems by predicting the customer communication experience. They enable organizations worldwide to accelerate the development, deployment and profitable operations of new, fluid, and complex communications by validating the quality of user experience and overall performance of networks and applications.

Hammer Test Solution

Simulates a wide range of user behaviors: phone calls, emails, video traffic, chat, web sessions, and more. QoS for voice, video and data.

E-XMS

For Mobile and LTE offers a single solution for analyzing multi-service (voice, video, data) & multi-protocol (LTE, 3GPP, CDMA, IMS, SS7) environments.

Hammer Call Analyzer

Quickly diagnose issues in complex IP environments with an integrated solution for analyzing UC, VoIP, & IMS calls.

OneSight

Measure true user experience, determine IP network performance, End-to-end view of the entire solution for Contact Center, Unified Communications, and VoIP Monitoring.

IntelliSight

Network & Application Performance Management, customer behavior & user trends, OTT & Service Characterization.

NOC to SOC

Real-time view of how customers are experiencing each service ie. Skype, Facebook, YouTube. Proactive assurance, faster time to repair and increased productivity.

RAN Vision

Real-Time, network-wide analytics solution to monitor, troubleshoot and optimize the Radio Access Network. Radio, Roaming & Handset Analysis.

VoLTE

Pre-deployment, Operations Tier 1, 2 & 3 support, Service Quality reports, protocol analysis to accelerate troubleshooting.
