

Booster

Engineered to transmit traffic from up to 8 ports (4 in-line links) into a single NPB port instead of 8, thereby enhancing Network Packet Broker ROI up to 800%.

ProfiShark 1G

All-in-one Gigabit Ethernet Troubleshooter. The ultimate solution for field testing and monitoring of GE networks.

MOD-TAP

Modular Fiber Optic Tap. Experience utmost flexibility with this new high-density modular non-intrusive in-line monitoring solution for 1G to 100G.

XX-32G

Aggregates traffic from multiple links and uses customizable filters to forward the most relevant data in real-time.

40G Bidirectional TAP

The Cisco 40G BiDi standard quadruples the speed in standard dual LC (OM3-4, 10G) data center cabling, thereby allowing for a cost effective migration from 10G to 40G.

C1D-100

The C1D-100 is ideal for demanding industrial environments, boasting 20 - 30 VDC powering, while still incorporating a lightweight, comprehensive functionality.
